Vista Host Launches Website for New Hampton Inn & Suites

Albany, New York

165 Room Hotel to Open Fall 2005

HOUSTON, TX — September 24, 2004 — Vista Host, a Houston-based management company for upscale limited feature hotel properties, launched the website today for the new Hampton Inn & Suites in Albany New York. The hotel is the first new lodging construction project in downtown Albany in over 20 years.

The website address is <http://www.hamptonsuitesalbany.com> and is live on the world wide web.

“We designed and implemented the website as a way to reach our future guests and business partners. The site will continue to be updated with progress of the construction and as we near the completion date it will accept reservations online through the Hilton network,” commented Joe Viglietta, Regional Operations Director, Vista Host.

Construction of the Hampton Inn & Suites is scheduled for completion in the fall of 2005. When completed, the hotel will have 118 guestrooms and 47 fully furnished suites. The exterior of the hotel will incorporate architectural features that portray the aesthetic character of Albany.

Mr. Viglietta also stated, “In today’s competitive business environment it is important to reach out to the community and disseminate information on a timely basis. Our early launch of this site accomplishes this and puts us in a position to compete for group business that typically books several months out.”

Featured on the web site are press releases, artist renderings, and information about the development and management companies.

Founded in 1977 by Michael Harrell, Vista Host is a nationally recognized management company committed to achieving superior results in operating hotels from their ability to blend the science of hotel management with the art of hospitality.
